7. [Leave & Holidays](#)
8. [Time Summary — closing the month](#)
9. [What your employees see](#)
10. [Bulk employee data — Data Workbench](#)

1. Before you start

This guide covers the **Workforce Management (WFM)** module as it is configured for BIM Infotech. It is written for administrators and supervisors — the people who set the rules, manage employees and sign off attendance each month. Every screenshot is from your own workspace.

Signing in

1. Go to `bim.bpmsquare.com` .
2. Sign in with your **User ID and password**, or with **Sign in with face** if you have enrolled.
3. Employees do not need a personal email address — your workspace is set to **User ID** login.

Who can see what

Role	Sees
Employee	My Workforce only — their own punches, timesheet, requests and calendar.
Supervisor	Everything below: Live board, Employees, Corrections, Roster, Leave & Holidays and Time Summary, for the people they supervise.
Administrator	All of the above, plus Settings → Workforce , where the rules themselves are set.

Note Workforce menu items are hidden from a plain employee login. If a supervisor tells you a menu item is missing, check their **WFM role** on the Employees screen first.

Finding your way around

The dark strip down the left is the navigation rail. It starts collapsed to icons — click the ► at the top to expand it and see the labels. Items are grouped, and the two groups that matter for WFM are:

Sidebar group	What is in it
WORKFORCE → Workforce	My Workforce, Live board, Employees, Corrections, Roster, Leave & Holidays, Time Summary.
ADMIN	Data Workbench (bulk import/export), Audit & Users.

Workspace-wide configuration is not in those groups — it is behind the ⚙ **gear icon** at the bottom of the rail, under **Settings → Workforce**.

Note Every screen in this guide also opens from the ⌘K command palette (Ctrl+K on Windows) — press it and type the screen name. It is the fastest route once you know what you are looking for.

2. Workforce setup — Settings → Workforce

HOW TO GET THERE

Left sidebar → ⚙ **Settings** (the gear at the bottom of the icon rail) → **Workforce**. Then use the tabs across the top: **General** · **Sites** · **Shifts** · **Leave Types** · **Kiosks**.

DIRECT LINK: [BIM.BPMSQUARE.COM/SETTINGS/WORKFORCE](https://bim.bpmsquare.com/settings/workforce)

Everything that shapes how people punch in and take leave lives in one place: **Settings → Workforce**. It has five tabs — General, Sites, Shifts, Leave Types and Kiosks.

Important Changes here affect every employee immediately. On the General tab nothing is saved until you press **Save** at the bottom; the Sites, Shifts and Leave Types tabs save row by row.

General — the attendance rules

Attendance rules, sites, shifts, leave types and holidays — everything that shapes how the workforce punches in and takes leave.

General Sites Shifts Leave Types Kiosks

SELFIE REQUIRED TO PUNCH 						
Shift punches — check in / out, bre						

Sun Mon Tue Wed Thu Fri Sat

No lateness or absence is marked on these days, or on configured holidays.

The monthly Excel export gets one sheet per type, so adding a type here gives those people their own payroll section. The **code** is what gets stored on each employee — changing a code that is already in use leaves those employees classified under the old value, so edit the label instead once people are assigned.

Which options appear in the punch-type dropdown. Check in, check out and breaks are always available.

Overtime ?

Work from home ?

Site visit ?

OVERTIME RATE PER HOUR ?

The General tab is a set of collapsible groups. Each one shows a one-line summary of its current state — click a group to open it and change anything inside. Your current settings are:

Setting	Your value	What it does
Timezone	Asia/Kolkata	The clock every day-boundary and lateness calculation runs in.
Employee self-service	On	Employees punch from their own phone. Turn this off if punching should be kiosk-only.
Employee login	User ID	No personal email needed — the system mints an internal address per employee.
Working hours	Check-out – check-in – breaks	Worked hours are net of breaks . This is the same figure the employee's timesheet and the monthly export show, so the two can never disagree.
Late marks per half-day	10	Every 10 late marks in a calendar month counts as one half-day deduction on the summary. It is a count only — no money is calculated from it.
Leave carry-forward	Unused leave lapses at year end	Switch to carry-forward if unused balance should roll into next year.
Selfie retention	60 days	Punch selfies are purged after 60 days. Enrolment photos are kept until the employee is deleted.
Face verification	Flag only	A face that does not match the enrolled photo raises a flag — it never blocks the punch.
Geofence enforcement	Flag only	A punch outside every site radius still succeeds, but is marked. Set it to <i>Block</i> to reject such a punch outright.
Location required to punch	Yes	Check in and check out are rejected without a location fix. Breaks and overtime are deliberately left alone, because those often happen indoors.
Selfie required to punch	Shift punches	Check in, check out and mobile-work starts require a selfie; breaks and overtime do not.
Weekly off days	Sunday	No lateness or absence is marked on these days, or on configured holidays.
Employment types	Full-time, Intern	The monthly Excel export gets one sheet per type .
Punch types	Overtime on	Work from home and Site visit are off. Check in, check out and breaks are always available.
Phone reminders	All off	Long-day, break and holiday-week push alerts — see the note below.

Setting	Your value	What it does
Alternate Saturdays	Off	Every Saturday follows the standing shift.
Email notifications	5 of 6 on	Per-event emails: late arrival, correction filed, leave filed, day flagged for recheck, overtime/WFH request, clarification message.

Important Never change an employment type's *code* once people are assigned to it. The code is what each employee record stores — changing it leaves those employees classified under the old value. Edit the *label* instead.

Note Phone reminders need two things before they deliver anything: push keys configured on the server, and the employee tapping *Turn on* for notifications on their own phone. Switching them on here alone will silently do nothing.

Sites

Settings
Workforce
Attendance rules, sites, shifts, leave types and holidays — everything that shapes how the workforce punches in and takes leave.

General **Sites** Shifts Leave Types Kiosks

1 site has no supervisor. Overtime, leave and correction requests from people working at Yelehanka office have nobody to approve them. Assign a supervisor below.

Sites
A site is a place people punch in at. Its **radius** is the geofence — how far from the pin a punch still counts as on-site. Its **supervisor** approves the overtime, leave and corrections of everyone assigned to work there, and you can name extra approvers alongside them so requests don't wait when one person is away.

Site	Supervisor	Geofence	Location	Status
Gowribidnoor office	Matheen Ahmed A (EMP-0012)	150 m	13.6171, 77.5177	Active
Manuvana Office	Matheen Ahmed A (EMP-0012)	150 m	12.0000, 77.0000	Active
RT Nagar office	Shabbir Syed (EMP-0001)	200 m	13.0324, 77.6075	Active
Vijayanagar Office	Matheen Ahmed A (EMP-0012)	150 m	12.9708, 77.5468	Active
Yelehanka office	Not assigned	150 m	13.1083, 77.5735	Active

A site is a place people punch in at. Its **radius** is the geofence — how far from the pin a punch still counts as on-site. Its **supervisor** approves the overtime, leave and corrections of everyone assigned to work there, and you can name extra approvers alongside them so requests do not wait when one person is away.

Site	Supervisor	Geofence
Gowribidnoor office	Matheen Ahmed A (EMP-0012)	150 m
Manuvana Office	Matheen Ahmed A (EMP-0012)	150 m
RT Nagar office	Shabbir Syed (EMP-0001)	200 m
Vijayanagar Office	Matheen Ahmed A (EMP-0012)	150 m
Yelehanka office	Not assigned	150 m

Important Yelehanka office currently has no supervisor, and the page warns about it at the top. Overtime, leave and correction requests from people working there have nobody to approve them — they will sit in the queue indefinitely. Assign a supervisor on that row.

Note Check each site's pin as well as its radius. A site whose coordinates are wrong will mark every punch there as outside the geofence; because your geofence setting is *Flag only*, those punches still succeed but arrive flagged for review.

Add a shift

NAME

General shift

START

09:00 AM

END

06:00 PM

GRACE (MIN)

10

NIGHT SHIFT

No

Add shift

Working hours people are expected to keep. **Grace** is how late someone can check in before it counts as a late mark. A shift whose end time is earlier than its start time runs past midnight — tick **Night shift** so those night hours are counted on the day the shift started, not split across two days.

Shifts

Name	Timing	Grace	Night shift	Night allowance	Status	
First Shift	07:00 – 15:30	30 min	—	—	Active	EditDeactivateDelete
General Shift	09:00 – 18:00	30 min	—	—	Active	EditDeactivateDelete
General Shift	09:00 – 18:00	30 min	—	—	Inactive	EditActivateDelete
General Shift	09:00 – 18:00	30 min	—	—	Inactive	EditActivateDelete
Second Shift	14:00 – 23:00	30 min	—	—	Active	EditDeactivateDelete
OT	21:00 – 06:00 next day	10 min	—	—	Active	EditDeactivateDelete

A shift is the working hours people are expected to keep. **Grace** is how late someone can check in before it counts as a late mark. Add one with the form at the top; existing shifts can be edited or deactivated.

Shift	Timing	Grace	Status
First Shift	07:00 – 15:30	30 min	Active
General Shift	09:00 – 18:00	30 min	Active
Second Shift	14:00 – 23:00	30 min	Active
OT	21:00 – 06:00 <i>next day</i>	10 min	Active

Important A shift whose end time is earlier than its start time runs past midnight — tick **Night shift** so those hours are counted on the day the shift *started*, rather than split across two days. Your OT shift (21:00–06:00) is the one this applies to.

Note Your shift list also holds two inactive duplicate “General Shift” rows. They are harmless — inactive shifts cannot be assigned — but tidying them up makes the roster dropdown clearer.

Leave Types

The screenshot shows the 'Leave Types' configuration page. It includes a table with the following data:

Name	Category	Quota	Max a month	Paid days a month	In use	Status
CompOff	Paid	1 / month	1 (quota)	—	1 record, 4 requests (2 pending)	Active
Paid Leave	Paid	20 / year	—	—	2 records, 3 requests	Inactive
Sick	Paid	1 / month	1 (quota)	—	1 record, 2 requests (1 pending)	Active
Unpaid Leave	Unpaid	12 / year	—	—	2 records, 5 requests	Inactive

Leave types are what people can request time off as. Each one is **Paid** or **Unpaid**, which is what splits the *Paid leave* and *Unpaid leave* columns on the monthly summary — so get these right before the first month closes.

Field	What it does
Quota	Each employee's default allowance, per month or per year.
Max a month	A monthly quota is <i>also</i> the most anyone can take that month — a request beyond it is refused. A yearly quota can carry a separate monthly cap.

Field	What it does
Paid days a month	Pays only the first N days of that type each month; the rest count as unpaid on the time summary.

Your active types are **CompOff** (paid, 1/month) and **Sick** (paid, 1/month). **Paid Leave** (20/year) and **Unpaid Leave** (12/year) are currently inactive.

Note A leave type that already has history can be **deactivated but never deleted** — that is deliberate, so past months keep reporting correctly. Deactivating simply stops anyone requesting it from now on.

Kiosks

Register a kiosk tablet
On the tablet, open <https://bim.bpmsquare.com/kiosk> in the browser (add it to the home screen for fullscreen), then paste the code generated here. Enrolled employees can then punch by face on it — no login on the device.

Name — e.g. Main door — site — [Generate kiosk code](#)

Name	Site	Status	Last seen	Registered	
Manuvana office	Manuvana Office	Active	09 Sept, 09:52 am	04 Sept, 09:42 pm	New code Deactivate
Gowribidnoor-kiosk	Gowribidnoor office	Active	10 Sept, 10:52 am	02 Sept, 12:29 pm	New code Deactivate
Gowribidnoor-kiosk	Gowribidnoor office	Deactivated	never	02 Sept, 12:07 pm	New code
Vijayanagar-kiosk	Vijayanagar Office	Active	10 Sept, 10:43 am	21 Aug, 12:45 pm	New code Deactivate
Test Door	RT Nagar office	Active	20 Aug, 11:20 pm	20 Aug, 11:15 pm	New code Deactivate

A kiosk is a registered tablet at a door. It identifies an enrolled employee by face and offers the valid punch buttons — no login on the device. Face punch is **on** for your workspace; an employee must have a face enrolled before a kiosk will recognise them.

3. Employees

HOW TO GET THERE

Left sidebar → **WORKFORCE** → **Workforce** → **Employees**.

What the columns mean

Column	Meaning
Code	The employee number (EMP-0001 ...), generated automatically and used on every export.
Type	Employment type — Full-time or Intern. Decides which sheet they land on in the monthly export.
WFM role	Employee or Supervisor. Supervisor unlocks the whole Workforce menu for that person.
Shift	Their standing shift, used whenever the roster has no specific assignment for a date.
Home site	Default site for geofence checks and site-based reporting.
Supervisor	Who approves this person's corrections, leave and overtime.
Login	Whether a sign-in has been created for them.
Consent	Whether they have accepted the biometric and data consent.

Column	Meaning
Face	Whether an enrolment photo exists — required for kiosk face punch and face sign-in.
Status	Active or inactive.

Common tasks

Task	How
Add someone	+ New employee , then fill in name, type, shift, home site and supervisor.
Change details	Select the row, then Edit .
Give someone a login	Edit the employee and set a User ID and password.
Reset a forgotten password	Select the row, then Reset password . Employees cannot reset their own — the sign-in page tells them to ask a supervisor.
Enrol a face	Select the row, then Enroll , and capture the photo. Needed for kiosk face punch and face sign-in.
Someone leaves	Deactivate — this keeps their history for past months. Use Remove only for a record created in error.

Important Deactivating an employee stops them appearing in day-to-day lists, but **does not by itself revoke an existing login**. When someone leaves, remove their login as a separate step.

An employee record

The screenshot shows a web application interface for managing employees. At the top, there's a search bar and user information. Below, a sidebar on the left contains navigation icons. The main content area displays the profile of 'Shabbir Syed', who is an 'Active' 'Supervisor'. His employee ID is 'EMP-0001' and he is 'Full-time'. He works at 'Site RT Nagar office' on a 'Shift General Shift'. His current month's total is '24h 16m' with '1 pending' status. Below this, there are tabs for 'Overview', 'Attendance', 'Corrections', 'Leave (1)', 'Roster', and 'Flagged'. The 'Overview' tab is selected, showing a 'LEAVE BALANCE' section with 'CompOff' and 'Sick' categories, each with a '1 / 1 left this month' status. To the right, a 'COMING UP' section indicates 'Nothing beyond the standing shift in the next 14 days' with a 'View full roster' link. The top right of the page includes a search bar, 'All objects' dropdown, and a user profile for 'sap.rashid@gmail.com'.

Opening an employee gives you everything about that person in one place — useful when you are investigating a disputed day before approving a correction. The header shows their code,

employment type, site, shift, hours this month and anything pending; six tabs sit underneath.

Tab	Shows
Overview	Leave balance per type, and what is coming up in the next 14 days.
Attendance	Every punch, day by day.
Corrections	Their correction requests and the outcome of each.
Leave	Their leave requests, with a count of anything pending.
Roster	Their site and shift assignments.
Flagged	Days the system marked for review.

4. Roster — who works where, on which shift

HOW TO GET THERE

Left sidebar → **WORKFORCE** → **Workforce** → **Roster**.

DIRECT LINK: BIM.BPMSQUARE.COM/WFM/ROSTER

Workforce → **Roster** assigns a **site** and a **shift** per employee, per date range. Where the roster says nothing, the employee's standing shift and home site apply, so you only need to roster the exceptions.

Everyone's standing site and shift; shift changes and days off for specific dates; and who is on which project, by date.

Upcoming — next 30 days

Dates	Employee	Shift	Note	
Thu, 10 Sept	Nayana M C EMP-0051	First Shift (07:00-15:30)	—	Remove

Assigning in bulk

- Narrow the list with the **site** dropdown at the top.
- Tick the employees you want, or use **Select all**.
- Use **Apply to ... selected** to set a site and shift for the chosen date range in one action.
- Press **Save changes**. Nothing is written until you do.

Note Each site and shift column also has its own **Assign all** shortcut, and **Clear all** removes assignments in that column.

Alternate Saturdays

If you switch **Alternate Saturdays** on in Settings, the **Generate** button here writes that month's short-Saturday roster rows and the 2nd-Saturday holiday. It only adds — it never overwrites an assignment a supervisor has already made.

5. Live board — today at a glance

HOW TO GET THERE

Left sidebar → **WORKFORCE** → **Workforce** → **Live board**.

DIRECT LINK: BIM.BPMSQUARE.COM/WFM/LIVE-BOARD

Workforce → Live board shows today's attendance as it happens: who is in, who is late, who has not arrived, and any flags raised on a punch.

Live board

Who's in, on break, out, late or absent right now — per site, refreshed automatically.

2026-09-10 · Asia/Kolkata · updated 12:08:09 pm · refreshes every 30s

Column	Meaning
Status	Present, late, absent or on leave for today.
First in / Last out	The earliest check-in and the latest check-out recorded so far.
Flags	Anything the system marked: outside geofence, face mismatch, missing selfie, incomplete day.

Note Use the **site filter** to narrow to one office. The *On login, show me* setting fixes which site you land on by default.

6. Corrections, flagged days and overtime

HOW TO GET THERE

Left sidebar → **WORKFORCE** → **Workforce** → **Corrections**. The three queues are the buttons at the top of that page.

DIRECT LINK: BIM.BPMSQUARE.COM/WFM/CORRECTIONS

Workforce → Corrections is the approval desk. It holds three queues, each with a **Pending / All** filter.

Queue	What lands here
Corrections	An employee asking to fix a punch — a missed check-in or check-out, or a wrong time.
Flagged for review	Days the system marked itself: outside geofence, face mismatch, incomplete day.
Overtime	Overtime sessions awaiting approval. Only approved overtime reaches the monthly summary and gets priced.

Approving

1. Open the queue and leave the filter on **Pending**.
2. Check the **Reason** and **Proposed time** against the employee's other punches that day.
3. **Approve** writes the corrected time into attendance, and it flows straight through to the timesheet and the monthly summary. **Reject** leaves the record as it was.

Important Approved overtime is what gets paid. It is priced at the **overtime rate per hour** set in Settings → Workforce. If that rate is 0, overtime hours are still tracked but no amount is calculated.

7. Leave & Holidays

HOW TO GET THERE

Left sidebar → **WORKFORCE** → **Workforce** → **Leave & Holidays**. Switch between the **Leave** and **Holidays** tabs at the top.

Workforce → Leave & Holidays has two tabs: **Leave** for requests, and **Holidays** for the company calendar.

Leave requests

Leave & Holidays
Approve leave requests, enter leave records directly, and manage the holiday calendar. Leave types are configured in Settings → Workforce.

Leave | Holidays

Leave requests

Employee	Type	From	To	Reason	Status	
Shabbir Syed EMP-0001	CompOff (half-day)	10 Sept 2026	10 Sept 2026	test	pending	<button>Approve</button> <button>Reject</button>
Barkath EMP-0028	Sick	09 Sept 2026	09 Sept 2026	I am suffering from cold and fever	pending	<button>Approve</button> <button>Reject</button>
Shahk Fazil EMP-0059	CompOff	12 Sept 2026	12 Sept 2026	Going Home town	pending	<button>Approve</button> <button>Reject</button>

Showing 1-3 of 3

Leave records

Employee	Type	From	To	Half-day	Remarks	
Abdul Nandapad	CompOff	10 Sept 2026	10 Sept 2026	Yes	personal	<button>Delete</button>
Mohsin Pasha	Sick	09 Sept 2026	09 Sept 2026	No	Fever	<button>Delete</button>
Aliyaa Ain	Unpaid Leave	07 Sept 2026	07 Sept 2026	No	medcial leave	<button>Delete</button>
Aliyaa Ain	Paid Leave	04 Sept 2026	04 Sept 2026	Yes	medical	<button>Delete</button>
Aliyaa Ain	Unpaid Leave	28 Aug 2026	28 Aug 2026	No	Health issues	<button>Delete</button>
Aliyaa Ain	Paid Leave	26 Aug 2026	26 Aug 2026	No	Eid	<button>Delete</button>

Showing 1-6 of 6

Add a leave record directly

EMPLOYEE: LEAVE TYPE: FROM: TO: HALF-DAY:

REMARKS:

Add leave

1. Leave the filter on **Pending** to see only what needs a decision.
2. Review the employee, leave type, dates, half-day flag and reason.
3. **Approve** or **Reject**. Approved leave shows as leave — not absence — on the monthly summary.

Note Add leave lets you record leave on someone's behalf, for a phone call or a paper form. The leave types themselves, and whether each is paid, are configured under Settings → Workforce → Leave Types.

Holidays

Add holiday takes a date, a name, and who it **applies to** — everyone, or a single site. No lateness or absence is marked on a holiday, and the holiday-week reminder reads this same list, so the calendar and the timesheet can never disagree.

Important Set the holiday calendar for the year **before** the month starts. Adding a holiday after the fact does not retrospectively rewrite days you have already closed off and exported.

8. Time Summary — closing the month

HOW TO GET THERE

Left sidebar → **WORKFORCE** → **Workforce** → **Time Summary**. Pick **Daily — detailed, Monthly summary** or **Custom range** at the top.

DIRECT LINK: BIM.BPMSQUARE.COM/WFM/SUMMARY

Workforce → Time Summary is where the month is closed and handed to the CA. It has three modes: **Daily — detailed, Monthly summary** and **Custom range**.

Reading the month

The three cards at the top summarise the month before you look at anyone individually: how days split across present, late, absent, leave, week off and incomplete; how many employees need attention and why; and headcount by site.

Column	Meaning
Days present / Absent	Counted against the roster and the holiday calendar.
Hours	Worked time, net of breaks .
Late marks	Check-ins later than shift start plus that shift's grace period.
Half-day ded.	Late marks divided by 10, per your setting.
Paid / Unpaid leave	From approved leave requests, split by whether the leave type is paid.
Holidays	Days from the holiday calendar that fall in the period.
Night shifts / Night allowance	Shifts qualifying for the night allowance, and the amount.
OT hrs / OT amt	Approved overtime only, priced at the configured rate.
Incomplete	Days with a missing punch. Chase these before exporting.

Exporting for payroll

1. Pick the month.
2. Clear the **Incomplete** column first — every incomplete day is an unresolved correction.
3. Press **Export to Excel**. The workbook has **one sheet per employment type**.

Important Export only once the Corrections and Overtime queues are empty for that month. Anything approved after you export will not be in the file you have already sent.

9. What your employees see

HOW TO GET THERE

This is what the *employee* sees after signing in: **Workforce** → **My Workforce**. Supervisors and admins have the same screen for their own attendance.

DIRECT LINK: BIM.BPMSQUARE.COM/WFM/ME

Employees get a single screen — **My Workforce** — on their phone. Knowing what it looks like makes their questions much faster to answer.

Tab	What they do there
Attendance	Check in, check out, start and end a break, and start overtime.
Time	Their own timesheet — worked hours, net of breaks.
Requests	File a correction, request leave or overtime, and track the status.
Calendar	Their roster, holidays and approved leave.

Tab	What they do there
Profile	Consent, face enrolment and password.

The three things they will ask you

They say	The cause
"It won't let me check in."	Location is required for check in and check out in your workspace. If they denied the location permission the punch is rejected. They must tap Allow location .
"It's asking for a photo."	A selfie is required for shift punches. Denying the camera ends the punch — it does not fall through without one.
"I forgot to punch out."	They file a correction from Requests , and it appears in your Corrections queue.

Note **Install app** adds BPMSquare to the phone's home screen. It is the same web app, not a download from an app store.

10. Bulk employee data — Data Workbench

HOW TO GET THERE

Left sidebar → **ADMIN** → **Data Workbench**. Choose **Import / Export / Update** at the top, then the **Employees** object.

DIRECT LINK: [BIM.BPMSQUARE.COM/DATA-WORKBENCH](https://bim.bpmsquare.com/data-workbench)

Data Workbench moves employee records in and out in bulk, using Excel or CSV. Choose the **Employees** object, then one of three modes.

Mode	Use it to
Import	Create new employees from a file — onboarding a whole site at once.
Export	Pull every employee out, including the real record ID.
Update	Change existing employees in bulk.

The rule that saves you

Important A file for Update must come from an Export. Update matches rows on the **Record ID** column, and only an Export fills that in. Never hand-type it or build an update file from names or codes — two people can share a name, and a mistyped ID can land the change on the wrong record.

1. Pick **Employees**, then **Export**, and download the file.
2. Edit only the columns you intend to change. Leave **Record ID** untouched.
3. Switch to **Update**, upload the edited file, match the columns, and read the preview before confirming.

Note Templates always match your current field setup, including any custom fields you have added, so download a fresh template rather than reusing an old one.

Note Data Workbench also lists objects belonging to other BPMSquare modules that your workspace does not use. For BIM, **Employees** is the relevant one.
